

Oxford, 5 June 1998

Dear Michael,

I am glad to be able to report that everything is going well here in Oxford. I have had useful discussions with Harvey, Guido and Oly Sherk on statistical mechanics - I will soon send you a copy of my paper on Lebowitz's arguments. Together with Oly I have organised a reading group on the Ehrenfechts' book, which has been a success.

I am also working on quantum cosmology - in the next two weeks I am going to meet up with Jeremy to discuss drafts for two papers.

At the end of September I will return to Cambridge. Peter Zipter has invited me to give the four part IB lectures on philosophy of physics and Peter Smith has invited me to give four lectures on time-symmetry for the philosophy tripos. On 26 November I will give the HPS departmental seminar.

I received an e-mail from Professor Van der Merwe concerning the proofs for an spin-echo paper. I have asked him to send the proofs to Oxford, so I can correct them using the original computer file.

Finally, could you please complete the

appropriate parts of the British Academy
James and send them on to Peter
Lipton ? Thanks very much.

Have a good summer!
Best wishes,

Victoria
